

# MAGGIE'S MAGIC ANT KILLER STUFF

## INGREDIENTS:

- |   |             |            |
|---|-------------|------------|
| 1 | Cup         | Sugar      |
| 2 | Cups        | Warm water |
| 3 | Tablespoons | Borax      |

## DIRECTIONS:

1. Mix the sugar and borax well.
2. Add the warm water slowly, mixing all the while, so that it will not be too lumpy.
3. Store in jar until ready to use.

## WHEN READY TO USE:

1. Find something small and low like a lid from sour cream, or jar. I did read that for outside you could put this mixture in a soda can and putting in on its side where ants are. This way dogs, cats, and other critters won't get into it.
2. Stir Ant Killer Stuff well.
3. Pour into lid.
4. Place lid where you see ants, put right in their path – this way they can find it faster.
5. That is it. The ants will do what ants do, take it back to the colony. The other ants will eat it, and they will die.

WHERE DO I GET THIS STUFF AT? Borax is NOT the same as boric acid!!!  
Wal-Mart and most grocery stores carry it in the laundry section.
